Google I/O: Raumfeld to implement Google Cast for audio

Berlin, 18 May 2016 – At this year's Google I/O, Google will be presenting its partner products for the streaming infrastructure Google Cast for audio, including Raumfeld multi-room speakers. The use of this technology is set to greatly increase the number of music streaming services supported by the German streaming brand.

Raumfeld and Google Cast for audio at a glance:

- Google Cast for audio enables multi-room music streaming on compatible loudspeakers
- Many popular apps support Google Cast for audio, including Deezer, Qobuz Juke and Google Play Music
- The speakers access audio streams directly from the cloud, freeing control devices (smartphones and tablets) for other purposes
- Google Cast for audio works with Android and iOS apps as well as audio content from the Chrome browser on PCs, Macs and Chromebooks
- All current Raumfeld multi-room speakers will support Google Cast for audio after an update
- Raumfeld's Google Cast for audio implementation is currently undergoing an internal beta test
