

Press Release

Teufel x Rosenthal

Lead a life of loud design

Limited edition porcelain sound system unites two companies that couldn't be more different, yet complement each other perfectly - Rosenthal and Teufel Audio.

Berlin/Selb, 5.2.2019 – When you think porcelain your mind doesn't jump to loudspeakers. However, porcelain's special material thickness and its vibrational behaviour make it the perfect candidate for creating loudspeakers. The 2.0-system from Teufel x Rosenthal combines these advantages in a unique, curved design. The teamwork of both German manufactures welcomes the world's first wireless streaming loudspeaker made out of Rosenthal porcelain.

Overview of features:

- World's first wireless loudspeaker system made out of fine porcelain.
- Limited edition with only 500 sets being created.
- Amplifier and casing are handmade of extremely hard, white porcelain.
- Powerful high-end coaxial driver for balanced, true-to-original playback with precise stage representation
- Wireless streaming with the Teufel Raumfeld app for music by Spotify, TunesIn, Napster, TIDAL and SoundCloud
- Stream any source via Bluetooth from PCs, Macs, Tablets and Smartphones
- Connectable with other Teufel streaming and Raumfeld speakers for lossless multi-room streaming
- Control keys directly on the amplifier for on/off, volume & additional freely assignable station keys for radio stations and playlists
- Alarm clock, sleep timer, energy saving function, line-in for CD player or turntable, stand and cables included
- now available at the price of 3.990 Euro (RRP) at www.teufelaudio.com, in all Teufel Stores and at selected Rosenthal retailers
- Distinctive Design

"Porcelain is a versatile and widely usable material which, thanks to its silky matt surfaces and high material density, combines maximum aesthetics with perfect sound," claims Robert Suk, Head of Creative Centre at Rosenthal GmbH. "Thanks to our cooperation with Rosenthal, we have succeeded in developing a loudspeaker that is unique in every respect and meets the highest sound and design standards," adds Sascha Mallah, Managing Director of Teufel Audio GmbH. The design of the loudspeaker casing has acoustic characteristics from the round shape, which reduces distortion.

High-End Technic

The set consists of two porcelain loudspeakers and an amplifier unit also made of white porcelain with an output of 160 watts. Operation is via the Teufel app or via the touch-sensitive keys on the porcelain amplifier. The loudspeakers are connected to the central unit via two fabric-covered cables, each is three metres long. In the two loudspeakers, high-end coaxial drivers ensure an extremely balanced, reliable playback with precise stage representation. Teufel x Rosenthal is compatible with all Teufel and Raumfeld multi-room streaming speakers. Music is transmitted wirelessly to the system via Bluetooth or Spotify Connect via the Teufel app with the integrated streaming services Tidal, Napster, SoundCloud and TunesIn. In addition, there is a line-in input to which any audio source can be connected.

Made in Germany: Handmade with the highest precision

The production of the porcelain casing of the new Teufel x Rosenthal loudspeakers is characterised by the highest level of craftsmanship and skill. The drop-shaped loudspeaker with integrated bass reflex tube is cast by hand and in one piece from a special hard porcelain casting compound by Rosenthal in Germany. The opening in the loudspeaker, which has its seven perfectly fitting holes for attaching the frame, is already made in the form. Rosenthal made special kiln furniture in the form of a half-shell for the glow and smooth firing. The loudspeaker body is embedded in this to ensure dimensional stability at temperatures of up to 1,400 degrees Celsius. The finished fired porcelain body is then polished, giving it a velvety matt surface and unique appearance.

Price, availability and delivery scope

Teufel x Rosenthal is limited to 500 sets and is now available at www.teufelaudio.com, in all Teufel stores and at selected Rosenthal dealers at a price of 3,990 Euro (RRP). The set consists of two porcelain loudspeakers, the amplifier in the porcelain casing and the necessary connecting cables.

About Rosenthal

Rosenthal was founded more than 135 years ago, but today still develops porcelain products that impress with their form, function, quality and craftsmanship. These pieces are a piece of cultural heritage from Germany and they lead with their constant innovative power and creativity.

Established greats of architecture, design and art as well as the hottest newcomers and talents create extraordinary collections for Rosenthal. Today Rosenthal GmbH owns the brands Rosenthal, Rosenthal meets Versace, Hutschenreuther, Thomas, Arzberg and Sambonet.

Production takes place in Germany at the Rothbuehl plant in Selb and the Thomas in Kulm plant in Speichersdorf, which are among the world's most modern production facilities for the porcelain industry.

About Teufel Audio

Teufel is one of Germany's largest manufacturers of audio products. Teufel's product range includes Hi-Fi, home cinema and multimedia systems, headphones, Bluetooth and Wi-Fi multi-room speakers featuring the company's own Raumfeld technology. The company first began developing speaker kits in Berlin in 1980 and is now the no. 1 manufacturer of audio products in Europe.

Since its foundation, the company has been setting trends in areas such as stereo and surround sound, portable speakers and multi-room streaming. At Teufel, excellent sound is always our top priority - and our numerous awards from consumers and trade press are proof of its success
